San Diego Gas & Electric

RECORDED RULE PR 50,51,100
45 FR 79820

January 6, 1981

FEB 000

Secretary of the Commission
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attention: Docket and Service Branch

Dear Sir:

Pursuant to the request for comments on the "Notice of Intent to Prepare an Environmental Impact Statement for Revision of the Regulations Governing the Siting of Nuclear Power Plants", Federal Register, Vol. 45, No. 233, page 79820ff, December 2, 1980, I request consideration be given to my earlier comments submitted to Samuel J. Chilk on September 12, 1980. My earlier comments were in response to the request for comments on "Advance Notice of Rulemaking: Revision of Reactor Siting Criteria"; NRC receipt of those comments was acknowledged by NRC Form-41, dated September 15, 1980.

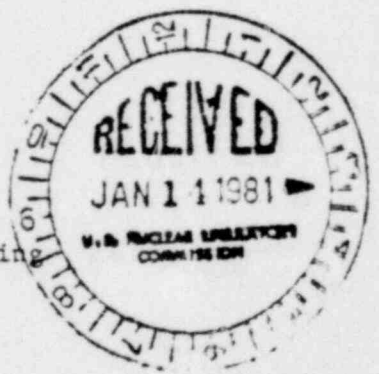

It is my conviction that my earlier comments are both pertinent and useful to the Commission's current action.

If I can be of further service, please feel free to call upon me.

Sincerely,

L. Bernath
