

002563

Secretary of the Commission  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555  
Attention: Docketing and Service Branch

DOCKET NO. 79-1000  
PROPOSED  
SMELT

Dear People,

This is to register my extreme disapproval of your proposal to use "hot scrap" in the production of a variety of goods. The potential health risks involved remain reason enough to permanently reject such use of low-level radioactive wastes. I am shocked that any consideration is being given to subjecting the American people to daily exposure from contaminated consumer products.

I reiterate that I strongly object to the proposals detailed in your news release of October 27, 1980.

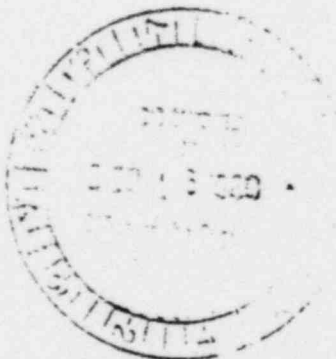

Please put me on the mailing list for future NRC news announcements.

Your response to my concern would be greatly appreciated.

Sincerely,

*Paula Koneazny*
