

December 9, 1980

DOCKET NUMBER PR-80, 32, 70, 150
PROPOSED RULE (45 FR 70874)
SMELTED ALLOYS

001886

10503 Sandra Lynn
Dallas, Texas 75228

Secretary of the Commission
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Members of the N. R. C. :

I am greatly opposed to the "Scrap Metal Regulation". This is a serious threat to public health. These "small" amounts of radiation, when combined, become a very large amount!

There should be stronger regulations to prevent the growing threat of exposure to radiation. If this regulation is passed the results will be your responsibility. The likes of which I would't want on my conscious.

I would like to request that I be put on the mailing list for NRC News announcements. Thank you.

Sincerely,

Mary Ann Sharp

L-4-1, P. 30
