PROPOSED RULE (45 FR 70874)
SMELTED ALLOYS

To the Secretary of the Commission,

I have been informed that the Nuclear Regulatory Commission wants to sell radio active scrap metal to the public for consumer products. Is this going to solve the problem of eliminating nuclear waste? This is an outrage to me and every human being living in our country. It seems to me that nuclear energy is getting out of our hands and I am against this proposal. Reassure me that this outrageous plan will not continue.

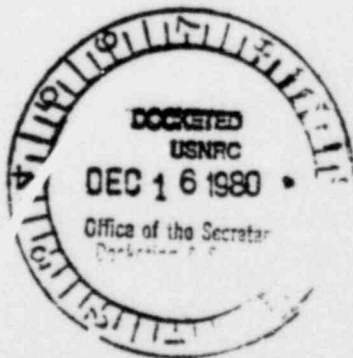

Sincerely,

Joseph Lanzetta
