January 30, 1981

Mr. Darrell G. Eisenhut, Director  
 Division of Licensing  
 U.S. Nuclear Regulatory Commission  
 Washington, DC 20555

Subject: Zion Station Units 1 and 2  
NUREG-0737 Item I.C.5,  
Procedures for Feedback of  
Operating Experience to Plant Staff  
NRC Docket Nos. 50-295/304

- References (a): D. G. Eisenhut letter to All Licensees dated October 31, 1980.
- (b): J. S. Abel letter to D. G. Eisenhut dated December 15, 1980.

Dear Mr. Eisenhut:

In Reference (b), Commonwealth Edison Company provided to the NRC a summary description of our conformance to the NUREG 0737 Enclosure 1 implementation dates. For Item I.C.5, we indicated our intent to have procedure revisions in place by January 1, 1981, which provide for feedback of Operating Experience at Dresden, Quad Cities and Zion Stations.

A corporate procedure providing for the operating experience assessment function was in place as required by Item I.C.5 and Zion Station was performing this function as of January 1, 1981. However, the Zion Station procedure revisions implementing this item were not in place until January 30, 1981.

The reason for this delay is attributed to an isolated communications problem between the corporate department coordinating this function and the station, and as such is not expected to recur.

One (1) signed original and thirty-nine (39) copies of this transmittal are provided for your use. Please address any questions you may have concerning this matter to this office.

Very truly yours,

*J. S. Abel*  
 J. S. Abel  
 Director of  
 Nuclear Licensing
