Mr. Jerome Saltzman, Chief
Utility Finance Branch
Division of Engineering
Office of Nuclear Reactor Regulation
United States Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Saltzman:

In response to your February 5, 1981 letter requesting the current status of our negotiations with the Michigan Public Power Agency, the City of Lansing, and the Wabash Valley Rural Electric Cooperative regarding their interest in purchasing a part of Detroit Edison's generation, we submit the following:

The Wabash Valley Rural Electric Cooperative (Indiana) has withdrawn its interest in the potential participation in our Greenwood No. 1 Unit.

The Michigan Public Power Agency and the City of Lansing Board of Water and Light have withdrawn their interest in our Enrico Fermi No. 2 Unit. However, the Michigan Public Power Agency has expressed a continuing interest in possible ownership of a portion of our Belle River Plant. A letter of intent was drafted and forwarded to them in the summer of 1980 and is now under consideration.

The City of Lansing Board of Water and Light has indicated that they will probably build to meet their own future generation requirements.

If you have any questions or require any additional information, please contact me at your convenience.

Sincerely,

Harry Tauber
