Dr. N. A. Wogman, Manager  
Radiological & Inorganic Chemistry Section  
Battelle Pacific Northwest Laboratories  
P. O. Box 999  
Richland, WA 99352

Dear Dr. Wogman:

I have reviewed your monthly report for the "Environmental Cleanup Standards" (B-2216-0) for December, 1980, and have the following comments:

1. The literature search appears to be progressing satisfactorily at this time.
2. The protocols developed for the Workshop on "Radiological Surveys in Support of the Edgemont Cleanup Action Program" should be finalized; and, upon completion of the Workshop, all questions, comments and discussions of such protocols should be published as part of the proceedings of the Workshop.
3. Again, your draft of a simple program which could be utilized specifically to "field test" the track etch device for obtaining either the integrated working level or the radon level inside a structure should also be submitted in your next monthly report.

These considerations were discussed with V. W. Thomas on February 2, 1981, but if you have further questions on these matters, please contact me at 301-427-4541.

Sincerely,

A handwritten signature in cursive script that reads "Gregory G. Eadie".
