

UNITED STATES OF AMERICA
NUCLEAR REGULATORY COMMISSION

OFFICE OF NUCLEAR REACTOR REGULATION
HAROLD R. DENTON, DIRECTOR

In the Matter of)
DUKE POWER COMPANY) DOCKET NOS.: 50-413/414
(Catawba Nuclear Station, Units 1 and 2))

ISSUANCE OF ADDENDUM TO DIRECTOR'S DECISION UNDER 10 CFR 2.206

On March 13, 1979, notice was published in the Federal Register (44 FR 14654) that, by petition dated January 28, 1979, Mr. Jesse L. Riley, President, Carolina Environmental Study Group (CESG), had requested that the Commission reopen safety phases of the licensing proceedings for Duke Power Company's Catawba Nuclear Station and McGuire Nuclear Station. CESG has asserted several issues as the basis for its request. On March 7, 1979, the Director of the Office of Nuclear Reactor Regulation advised CESG that its request to reopen the McGuire proceedings had been referred to the Atomic Safety and Licensing Board since the matter of issuance of operating licenses for the McGuire facility was currently pending before that Board. The Catawba case was not currently pending before any Licensing or Appeal Board. Consequently, the CESG's request with respect to Catawba was treated as a petition under 10 CFR 2.206 of the Commission's regulations to reopen the safety hearing for the Catawba Nuclear Station.

The Director of Nuclear Reactor Regulation denied the petition in the Director's Decision 81-1 issued on January 9, 1981. However, a portion of the Staff's analyses of the CESG petition was unintentionally omitted from that Decision. Consequently, the Staff has prepared an Addendum to supplement the Director's Decision.

Copies of the addendum are available for inspection in the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the Local Public Document Room for Catawba, located at the York County Library, 325 South Oak Avenue, Rock Hill, South Carolina 29730. A copy of the addendum will also be filed with the Secretary for the Commission's review in accordance with 10 CFR 2.206(c) of the Commission's regulations.

As provided in 10 CFR 2.206(c), the Addendum will constitute the final action of the Commission twenty-five (25) days after the date of issuance, unless the Commission, on its own motion, institutes a review within that time.

Harold R. Denton, Director
Office of Nuclear Reactor Regulation

Dated at Bethesda, Maryland
this 6 day of February 1981
