NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

FEB 19 1981

FOR TERA

Docket Nos. 50-317  
and 50-318 ✓

Baltimore Gas & Electric Company  
ATTN: Mr. A. E. Lundvall, Jr.  
Vice President, Supply  
P.O. Box 1475  
Baltimore, MD 21203

Gentlemen:

We have received a copy of your application dated November 10, 1980, which was filed with the Office of Nuclear Reactor Regulation (ONRR) for review. The application proposed Technical Specification Changes relating to six areas of the Calvert Cliffs TS as requested by ONRR's letter dated July 2, 1980 on TMI-2 Lessons Learned Category "A" items. Fees pursuant to 10 CFR 170.22 were not remitted with this application since the July 2 letter stated that licensing action associated with the Lessons Learned activities would be exempt from fees. By letter dated August 7, 1980 (copy enclosed), ONRR advised all operating power reactor licensees that the exemption stated in the July 2 letter was not justified, and that licensees should include fees pursuant to 10 CFR 170.22 for responses to the July 2 letter. Therefore, licensees who have not paid fees are being requested to do so.

Based on information provided by the ONRR staff as a result of a preliminary review of your application, it has been determined that the required review will involve consideration of several safety issues. On this basis, this application requires a Class IV fee of \$12,300 for Unit No. 1 and a Class I fee of \$400 for Unit No. 2. It is requested that your Company remit a total of \$12,700 to this office. If the ONRR staff's final review of your application reveals that these fees are incorrect, an adjustment will be made.

Sincerely,

Reba M. Diggs  
Facilities Program Coordinator  
License Fee Management Branch  
Office of Administration

Enclosure:  
Letter 8-07-80

I

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

August 7, 1980

TO ALL OPERATING POWER REACTOR LICENSEES

By my letters dated July 2, 1980 (References 1 & 2), I transmitted sample Technical Specifications associated with TMI-2 Lessons Learned Category "A" items. That letter included a preliminary determination by the staff that licensing action associated with TMI-2 Lessons Learned would be exempt from fee per 10 CFR 170.11. We have reviewed the initial determination and now determine that such exemption from fee is not justified. Therefore, please disregard that previous determination. Your submittal in response to our request should include your proposed Class of Amendment pursuant to 10 CFR 170.22.

Sincerely,

A handwritten signature in cursive script, appearing to read "Darrell G. Eisenhut".

Darrell G. Eisenhut, Director  
Division of Licensing  
Office of Nuclear Reactor Regulation
