

APPENDIX A

NOTICE OF VIOLATION

Mercy Hospital
Springfield, Massachusetts
License No. 20-00096-02

Docket No. 30-1804

Based on the results of an NRC inspection conducted on October 2, 1980, it appears that certain of your activities were not conducted in full compliance with NRC regulations and the conditions of your license as indicated below:

- A. 10 CFR 20.203(4) requires that prior to disposal of an empty uncontaminated container to unrestricted areas, each licensee remove or deface the radioactive material labels or otherwise clearly indicate that the container no longer contains radioactive materials.

Contrary to this requirement, on the date of the inspection, October 2, 1980, labels on containers were not defaced prior to disposal to an unrestricted area.

This is an infraction.

- B. Condition 19 of your license requires that licensed material be possessed and used in accordance with statements, representations and procedures contained in your application dated August 30, 1977 and various letters, one of which is dated February 27, 1978.

Item 5 of this letter requires the responsibilities, duties and meeting frequency of your Medical Isotopes Committee be as in Appendix B to the NRC's Guide for Preparation of Applications for Medical Programs. Appendix B requires quarterly meetings of the Medical Isotope Committee.

Contrary to the above requirement, as of October 2, 1980, the Committee did not meet from November 21, 1979 to July 3, 1980, a period greater than one quarter.

This is an infraction.
