

ALAN CRANSTON
CALIFORNIA

DOCKET NUMBER FD-30, 32, 70, 150
PROPOSED RULE (46 FR 70374)
SMELTED ALLOYS

3272

United States Senate

WASHINGTON, D.C. 20510

December 31, 1980

To: Congressional Liaison
Nuclear Regulatory Commission
1717 H Street, NW
Washington, D.C. 20555

Enclosure from: Dr. Leona M. Bayer
2535 Vallejo Street
San Francisco, California 94123

Re: Please comment on the concerns raised in the attached letter regarding use of spent uranium.

I forward the attached for your consideration.

Your report, in duplicate, along with the return of the enclosure will be appreciated.

Sincerely,

Alan Cranston

NUCLEAR REGULATORY COMMISSION
1717 K. Street N.W.
Washington D.C. 20545

Dear Staff Members:

A recent article in the S.F. Chronicle announces that your Commission is considering the sale of spent uranium for incorporation with other scrap metals into material to be offered for use in the manufacture of autos, home appliances and the like. I write concerning this matter for two reasons.

First, do you have any documents available which explain your findings and reasoning on this matter? If so, please mail me a copy.

Second, I wish to register a strong protest against any such possible action. I do not want any low level radiation in my soup, or my coffee or my car. How do I think my fellow citizens in the U.S.A. should be subject to such an added cancer risk.

Thank you for your attention.

Sincerely,

Copy for Senator CRANSTON
Leona M. Bayer, M.D.

L M Bayer

Dear Senator Cranston - This is a copy of my letter. I was advised by a physician in the Public Health Area that you was the most important advocate in this field. Sorry to burden you with no more than this. Thanks for all your good efforts.

Leona M Bayer
