Dr. R. Wayne Houston  
Chief, Accident Evaluation Branch  
United States Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Dr. Houston:

This is to confirm our recent phone conversation. The meeting to discuss surface deposition is scheduled for February 17 at 9:00 a.m. at the NRC offices. Will you let me know the meeting room? I have taken the liberty of inviting representatives from other interested groups. There may be as many as ten (10) including ourselves. With discussion, the meeting should not last more than half a day.

The tentative outline of our presentation is as follows:

- |   |                        |
|---|------------------------|
| I. Introduction   | Charles A. Pelletier   |
| II. Current Understanding of the Deposition - Resuspension Process.                                 | Paul G. Voilleque'     |
| III. Effect of Steam, Temperature, Water and Surface Material on Surface Deposition and Desorption. | Charles D. Thomas, Jr. |
| IV. Experimental Verification at Operating Power Plants.  | James E. Cline         |

If you have any questions, please call.

Sincerely,

*Charles A. Pelletier*

Charles A. Pelletier
