Attention: Mr. A. Schwencer
Mr. S. A. Varga

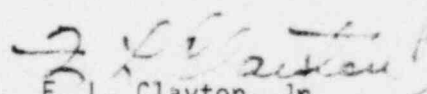

Dear Sir:

RE: J. M. Farley Nuclear Plant
Units 1 and 2
Dose Calculational Method

Revision 1 to the Farley Nuclear Plant Emergency Dose Calculational Manual (EDCM) was submitted by my letter of February 13, 1981. Attached is Revision 2 to the EDCM which has been discussed with the NRC staff. The intent of this revision is to improve the backup/interim Dose Calculational Method by (1) providing better plume boundary definition, (2) providing capability for off-axis dose rate calculations and (3) reducing the number of manual calculations required at the onset of an incident. Only Section II and III are affected by the changes.

If you should have further questions, please advise.

Yours very truly,

F. L. Clayton, Jr.
