Subject: Crystal River Unit #3
Docket No. 50-302
Operating License No. DPR-72
Technical Specification Change Request No. 55,
Revision 2

Dear Sir:

Enclosed are three (3) originals and forty (40) copies of Technical Specification Change Request No. 55, Revision 1, requesting amendment to Appendices A and B of Operating License No. DPR-72. As part of this request, proposed replacement pages for Appendices A and B are enclosed.

Florida Power Corporation has previously submitted in Technical Specification Change Request Nos. 55 and 55, Revision 1 an application for a license amendment concerning organizational changes in the offsite organization for facility management and technical support of Crystal River Unit 3 that have yet to be issued by the NRC. Change Request No. 55, Revision 1, which was submitted on April 23, 1980, is superseded by Revision 2.

Florida Power Corporation considers Change Request No. 55, Revision 2, to be a Class II amendment per 10 CFR 170.22 as it involves an amendment that is administrative in nature. The licensing fee for Change Request No. 55, Revision 2 was submitted with Change Request No. 55.

Proposed Change

Change the titles of Assistant Vice President, Power Production to Vice President, Power Production and Manager, Nuclear Operations to Assistant Vice President, Nuclear Operations in the offsite organization for facility management and technical support. Change the Director, Quality Programs to report to the Senior Vice President, Engineering & Construction. Change the Supervisor, Quality Programs to report to the Manager, Quality & Reliability Engineering.

Add the Manager, Nuclear Engineering to report to the Assistant Vice President, Nuclear Operations. The Nuclear Engineering portion of Production Engineering is reassigned to report through the new position of Manager, Nuclear Engineering to the Assistant Vice President, Nuclear Operations.

Add the Manager, Nuclear Materials Management to report to the Assistant Vice President, Nuclear Operations. This position is responsible for all purchasing and stores activities for the nuclear Plant.

Add the Manager, Nuclear Operations Controls to report to the Assistant Vice President, Nuclear Operations. This position is responsible for internal financial management controls.

Add the Site Manager Nuclear Administration to report to the Assistant Vice President, Nuclear Operations. This position incorporates the administrative services functions of the plant staff into a group reporting to the Assistant Vice President level which controls all administrative activities. The Site Manager Nuclear Administration is responsible to the Nuclear Plant Manager in the area of required procedural and documentation controls.

Add the Manager, Nuclear Operations Training is to report to the Assistant Vice President, Nuclear Operations. This position incorporates the training functions of the plant staff into a group reporting to the Assistant Vice President level responsible for all training activities within Nuclear Operations. The Nuclear Operations Training Manager is responsible to the Nuclear Plant Manager in the area of required training and documentation.

Reason For Proposed Change

The offsite organization for facility management and technical support has been reorganized from what is indicated in the Technical Specifications.

Safety Analysis and Benefit - Cost Analysis of Proposed Change

The change in the FPC organization does not modify any limits, or diminish any requirement applicable to the Safety Analysis; therefore, no unreviewed safety question is involved.

By naming an Assistant Vice President to be in charge of Nuclear Operations, this change demonstrates the commitment that FPC has made to support Crystal River Unit 3. By changing the reporting of the Director, Quality Programs to the Senior Vice President, Engineering & Construction, the functions of the Director, Quality Programs will be enhanced in regard to the execution of his responsibilites. His reporting to a senior management position two levels above the position which is directly responsible for operation of Crystal River Unit 3 maintains his independence from the operating organization in the execution of his responsibilities.

The establishment of the position of Manager, Nuclear Engineering reporting to the Assistant Vice President, Nuclear Operations, reflects the strengthening of the Company's management of the engineering functions supporting Crystal River Unit 3.

The establishment of the position of Manager, Nuclear Materials Management reporting to the Assistant Vice President, Nuclear Operations, demonstrates the significance which FPC places on the materials management functions related to its nuclear program.

By establishing the position of Nuclear Operations Training Manager reporting to the Assistant Vice President Nuclear Operations FPC has stregthened its commitment to training. This training is not limited to the plant staff but will improve our operation throughout the Nuclear Operations organization.

The establishment of the positions of Manager, Nuclear Operations Control and Site Manager Nuclear Administration is considered to add great efficiency to Nuclear Operations, in general, thereby strengthening the overall operation of Crystal River Unit 3 and supporting groups.
