REVISION 2 TO IE BULLETIN 79-01B NINETY-DAY REPORT

Dear Mr. O'Reilly:

Attached you will find Revision 2 to our Ninety-day Report on Environmental Qualification of Safety-Related Electrical Equipment. This report contains information only on installed TMI Action Plan equipment, since, due to the nature of BWR systems, the equipment necessary to achieve cold shutdown has already been listed in previous submittals.

The attached data deals with the SRV position indication system which is the only TMI Action Plant equipment currently installed at Brunswick. Additional equipment to be installed later will be dealt with under the requirements of Parts 2b, c, and d of Supplement 3 to IE Bulletin 79-01B.
