OFFICE
GENERAL DIRECTOR

The Honorable Richard S. Schweiker
U.S. Senate
253 Russell Senate Office Bldg
Wash. DC 20510

My dear Senator Schweiker:

Since the federal government is subsidizing nuclear power and is also responsible for safe & competent operation (through N.R.C) and since nuclear power customers across the nation should benefit from what is being learned at TMI, we are looking for your help to relieve the burden on us ~~the unfortunate few~~ we need federal aid to expedite the cleanup and remove the hazards especially for those downstream along the Susquehanna River. we will remember the help we get in this regard
