Attention: Mr. R. N. Moore  
United States Nuclear Regulatory Commission  
Office of International Programs  
Room 8211  
Maryland National Bank Building  
Bethesda, Maryland 20014

Dear Mr. Moore:

Nuclear Transport & Storage, Inc. wishes to either extend its present import license number SUI 1042 or apply for an additional license to import natural Uranium Hexafluoride (UF-6) in specification cylinders, from the Port of Montreal, Quebec, Canada to the United States Department of Energy Gaseous Diffusion Plants at Oak Ridge, Tennessee; Sargents, Ohio; and Paducah, Kentucky.

The material concerned enters Canada by sea from various European countries, principally, France and Germany for furtherance to the United States destinations described above.

The material involved is owned by companies in Europe. Shipments to Montreal and the United States are arranged by agents for the European companies.

Please let us know what additional information may be required in order to obtain the required import license.

Yours very truly,

NUCLEAR TRANSPORT & STORAGE, INC.
