Ross Scarano, Chief  
 Uranium Recovery Licensing Branch  
 Office of Nuclear Materials, Safety  
 and Safeguards (MS SS483)  
 U. S. Nuclear Regulatory Commission  
 Washington, DC 20555

Dear Ross:

This letter is to confirm some information which was discussed between William Shaffer of your organization and David Ball of my staff. The subject of the conversation was the remedial action for the Salt Lake County Fire Station and the adjacent properties.

We are going to issue the Invitation for Bids in the near future for the implementation of remedial action at the Fire Station and Harmony Park, an adjacent property south of the Fire Station. It is anticipated that a contract for this work will be awarded in May.

At the present time, Ford, Bacon and Davis, Utah, under our direction, is performing the engineering for another designated property (low income housing) just north of the Fire Station. Upon completion of this engineering effort, this remedial action will probably be performed as an addition to the aforementioned contract for the Fire Station and Harmony Park. If this work cannot be negotiated reasonably with the Fire Station remedial action contractor, then it will have to be performed as a separate procurement as soon as possible, so as to take advantage of the radiological and security facilities already in the area.
