

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

March 19, 1981

MEMORANDUM FOR: Participants in the Workshop on Frameworks  
for Developing a Safety Goal  
FROM: *Edward J. Hanrahan*  
Edward J. Hanrahan, Director  
Office of Policy Evaluation  
Workshop Chairman  
SUBJECT: ADVANCE INFORMATION PACKAGE

The Commission has completed action on its statement, "Development of a Safety Goal -- Preliminary Policy Considerations." Accordingly, I enclose for your use the final version of the statement (as it will appear in the Federal Register) and of its supporting report (to be published as NUREG-0764). These revised documents supersede items 5 and 6 that I sent you with the advance information package on March 11.

The main changes are as follows:

Item 5:

1. The ACRS proposal is given special emphasis as a focus for comments. (Page 4 of revised version.)
2. The section on "Criteria for Assessing an Approach to a Safety Goal" (pages 3-4 of the old version) has been omitted. Question 1(a) (referring to such criteria) has been amplified. (Page 14 of revised version.)
3. Abridgment and phrasing changes occur at various places.

Item 6:

The first 11 pages have been revised, notably Section II.A, dealing with considerations in formulating criteria for assessing an approach to a safety goal.

Enclosures:  
As stated
