Mr. Ivan W. Smith, Esquire  
Chairman, Atomic Safety and Licensing Board Panel  
Washington, D. C. 20555

Dear Mr. Chairman,

I oppose the opening of Three Mile Island Unit One for the following reasons:

- A. Unworkable emergency planning
- B. Psychological Stress
- C. Same management as before the accident

Unfortunately there has not existed the slightest shred of evidence that the entire intervention process in nuclear energy is anything more than the most callous of charades and frauds. Having tried to work through the regulatory process it has become increasingly clear the processes do not work to protect the public. Since the Nuclear Regulatory Commission continues to grant licenses for the murder of the public through the licensing of nuclear power facilities, it is clear the public can not count on protection against victimization through the regulatory process.

Respectfully,  
Orusilla Kosiba
