March 24, 1981

Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

Thank you for your letter of March 10, 1981 responding to my letter of December 15, 1980.

I will be looking for the Federal Register notice since Philadelphia Electric has now tendered its application for an operating license.

We do want a hearing and do want to be party to the proceedings. We trust that such a safety related issue of the blasting and concrete integrity is admitted to adjudication. We trust the blasting and concrete pour information, together with the need for cross-examination is recognized as necessary for safety for the people of the Limerick area.

Again thanking you for taking the time to write me, I remain

Very truly yours,

[Signature]
