U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Re: Perry Nuclear Power Plant
Docket Nos. 50-440; 50-441

Dear Mr. Eisenhut:

This letter is in response to Generic Letter 81-10 dated February 18, 1981 concerning post-TMI requirements for the Emergency Operations Facility.

The Perry Nuclear Power Plant is scheduled for an operating license (OL) in May 1983. We are currently taking steps to meet the intent of NRC guidelines on this subject for implementation prior to OL issuance. A description of the Emergency Operations Facility conceptual design will be provided by June 1, 1981 for pre-implementation review. Our FSAR will reflect our plans as they develop to allow for your review in connection with the OL review process.

Sincerely,

Dalwyn R. Davidson
Vice President
System Engineering and Construction
