SUBJECT: REVISION B4, OPERATING EXPERIENCE REPORT - IRRADIATED
FUEL STORAGE AT MORRIS OPERATTON, JANUARY 1972 TO
DECEMBER 1979, SEPTEMBER 1980, NEDO-20969B

Gentlemen:

Ten copies of the subject revision are enclosed. This revision contains updated text, tables, and charts incorporating data obtained during 1979 at General Electric's Morris Operation. The environmental monitoring report for 1979 combines Morris Operation and Dresden Nuclear Power Station data, due to a misunderstanding encountered in a contract renewal. A separate report for the Morris Operation will be provided for 1980 experience.

The 1979 data shows a continuation of the results of operations since January 1972 - - no significant environmental impact.

Please contact H.A. Rogers or C.C. Herrington of this office if there are questions regarding this revision.

Respectively,
