POOR ORIGINAL

Docket No. 50-278

Philadelphia Electric Company
ATTN: Mr. Edward G. Bauer, Jr.
Vice President and General
Counsel
2301 Market Street
Philadelphia, Pennsylvania 19101

Gentlemen:

We have received a copy of your application dated March 30, 1981, that was filed with the Office of Nuclear Reactor Regulation (ONRR) for review. The application proposed Technical Specification changes relating to Reload No. 4 for Unit No. 3 of the Peach Bottom Station, and was accompanied by a Class III fee of \$4,000 pursuant to 10 CFR 170.22.

Based on information provided by the ONRR staff as a result of a preliminary review of your application, it has been determined that the reload review will involve two safety issues (i.e., scram times per M CPR analysis using ODYN CODE and a change in NAPLHGR limits). On this basis, the application requires two Class III fees of \$4,000 each. It is requested that your Company remit an additional \$4,000 to our office. If the ONRR staff's final review of your application reveals that these fees are incorrect, you will be notified and an adjustment will be made.

Sincerely,

Original Signed by:
Reba M. Diggs
