OPERATING REACTORS LICENSING ACTIONS SUMMARY

Manuscript Completed: April 1981
Date Published: April 1981

Prepared for: OFFICE OF NUCLEAR REACTOR REGULATION

Prepared by: OFFICE OF MANAGEMENT AND PROGRAM ANALYSIS
U.S. NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

THIS DOCUMENT CONTAINS
POOR QUALITY PAGES

FOREWORD

THE OPERATING REACTORS LICENSING ACTIONS SUMMARY IS DESIGNED TO PROVIDE THE MANAGEMENT OF THE NUCLEAR REGULATORY COMMISSION (NRC) WITH AN OVERVIEW OF LICENSING ACTIONS DEALING WITH OPERATING POWER AND NONPOWER REACTORS. THESE REPORTS UTILIZE DATA COLLECTED FROM THE DIVISION OF OPERATING REACTORS IN THE OFFICE OF NUCLEAR REACTOR REGULATION AND ARE PREPARED BY THE OFFICE OF MANAGEMENT AND PROGRAM ANALYSIS.

THIS SUMMARY REPORT IS PUBLISHED PRIMARILY FOR INTERNAL NRC USE IN MANAGING THE OPERATING REACTORS LICENSING ACTIONS PROGRAM. ITS CONTENT MAY OCCASIONALLY CHANGE BASED ON NRC MANAGEMENT INFORMATIONAL REQUIREMENTS.

DEFINITIONS	I-II
<u>SECTION 1</u> MANAGEMENT OVERVIEW REPORT	
A. PLOT OF TOTAL ACTIVE LICENSING ACTIONS BY MONTH	A1
B. PLOT OF NEW ACTIONS BY MONTH	B1
C. PLOT OF COMPLETED ACTIONS BY MONTH	C1
D. ACTIVE LICENSING ACTIONS BY MONTH	D1-D2
E. ACTIVE POWER REACTORS LICENSING ACTIONS	E1-E2
F. ACTIVE NONPOWER REACTORS LICENSING ACTIONS	F1-F2
G. MANPOWER SUMMARY BY FACILITY	G1-G3
H. MULTI-PLANT ISSUES SUMMARY REPORT	H1-H3
I. FY TO DATE MULTI-PLANT & PLANT SPECIFIC ACTIONS	I1
J. POWER AND NONPOWER REACTOR HEARING SUMMARY	J1
K. COMPLETED LICENSING ACTIONS BY FEE CLASS	K1
<u>SECTION 2</u> LICENSING ACTIONS BY POWER REACTOR CONDENSED MANAGEMENT REPORT	1-123

Definitions

Page I

- I. Licensing Actions
 - A. Active Licensing Action - an item which has been initiated but not completed.
 - 1. Generic Licensing Action - a licensing action topic that applies to more than one operating reactor.
 - 2. Plant Specific Licensing Action - a licensing action associated with a certain facility because of the uniqueness of the technical specifications or situation, e.g., reduce the number of incore detectors.
 - B. Types of Licensing Actions
 - 1. Amendment - action that results in changes to facility licenses including technical specification changes.
 - 2. Hearings - Effort associated with public hearings that occur after an OL has been issued, including responses to interrogatories or discovery requests, preparation of testimony, etc.
 - 3. Letters to Licensees - letters sent to licensee requesting information that will resolve or aid in the resolution of technical issues. Examples of letters sent to licensees are: fuel handling inside containment, asymmetric loads or reactor vessel materials surveillance.
 - 4. Orders/Exemptions - actions on operating plant that result in an Order for Modification of a license or an exemption to the regulation.
 - C. Sources of Licensing Actions
 - 1. New Information - action required as a result of current data which shows that previously accepted requirements are no longer acceptable or are overly restrictive, e.g., ECCS input errors, asymmetric loads, equipment qualification. This new information may result from technological advancements, research or advanced analytical studies.
 - 2. Regulation - actions directly attributed to a specific regulation requirements, e.g., inservice inspection/testing requirements 10 CFR 50.55a(q).
 - 3. Operating Experience - action directly attributed to an occurrence of accumulative experience at licensed reactors e.g., fire protection.
 - 4. Licensee Requirement - action requested by the licensee that does not fit any of the other sources of licensing actions. Usually these actions are requested because of the licensee's desire to improve operational performance, e.g., core reloads, spent fuel pool modifications, or (N-1) loop operation.
 - 5. Internal Review - action resulting from NRC staff reviews of license applications, generic topics and operating reactor licensing actions, e.g., reporting requirements, fuel handling accidents, or filter tech spec requirements.

II. Significant Dates

- A. Initiation - for a hearing, it is the date that the hearing is actually ordered. For an amendment, it is either the date the amendment request is received from the licensee, or, in cases where DOR initiates the action, the date that authority is received to submit a letter requiring the amendment. For letters to the licensee, it is the date that authority is received to initiate a letter to the licensee.
- B. PM Target - project manager's anticipated completion date for active items.
- C. Licensing Action Complete - date on which all work, both technical and administrative was completed and sent out of the agency.

II. Other

- A. Fee Class - for action items received since March 27, 1978 where licensing fee classifications have been made by NRC and/or proposed by the licensee, it is one of the six fee classifications. If the amendment action item came in prior to that date the fee class is not applicable. (See 10 CFR, 170.22)
- B. New Licensing Action - item which was initiated or implementation actually began on the plant during the current reporting period (month and fiscal year).
- C. Complete Licensing Action - item on which all work, both technical and administrative was completed during the current reporting period (month and fiscal year).
