

RAYMOND C. R. SCHULZE  
23 NORTH JASPER AVENUE  
MARGATE, NEW JERSEY 08402

April 7, 1981

The Hon. John F. Ahearne  
Chairman  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Ahearne:

We have been too dependent on Mid-East oil for entirely too long. It is obvious that America would face chaos if that oil were cut off, which could be done by a reckless, unfriendly power. It should be very obvious to anyone that we must develop our readily-available supplies of coal and nuclear energy at the earliest possible moment, to assure the preservation of America; waiting until the oil is cut off is too late.

Therefore:

TMI No. 1 must be approved for restart at 100% immediately.

TMI No. 2 must be released to GPU immediately, for cleaning up and restoring to operation.

Also, all other nuclear units should be cleared for completion and operation just as quickly as possible.

This is not a matter of politics or prejudice or personal policy - it is a matter of national security in a very unsettled world.

Wake up - !

Sincerely,

*Raymond C.R. Schulze*  
Raymond C.R. Schulze
