PROCESSING MACHINERY DIVISION OF EN  
652 SOUTH FORTH WEST  
SALT LAKE CITY UT 84110  
43-14801-01

Gentlemen:

It has come to our attention that your NRC transportation activities may not be conducted in accordance with 10 CFR Part 71. Paragraph 71.12(b) of 10 CFR Part 71 (copy enclosed) requires among other things that you register with NRC prior to first shipment by certificate number for each package design you intend to use and have a copy of the package approval, drawings, and all references referred to in the certificate. Also, as a condition to the general license of 10 CFR §71.12, you must have an NRC approved Quality Assurance Program in accordance with 10 CFR §71.51. Enclosed is a sample QA plan for Industrial Radiography Licensees that the staff has found acceptable.

The above requirements apply to all shipments of radioactive material in excess of a Type A quantities (20 Ci in the form of sealed sources).

Sincerely,

*Charles E. MacDonald*  
Charles E. MacDonald, Chief  
Transportation Certification Branch  
Division of Fuel Cycle and  
Material Safety, NMSS

Enclosures:

1. 10 CFR Part 71
2. Sample QA Plan for Industrial Radiography Licensees

- We do not deliver to a carrier for transport licensed material in excess of 20 Ci per package.
- We already have an NRC approved QA program, approval number \_\_\_\_\_.
- An application for approval of a QA program and registration for package design(s) have been submitted under separate cover.

Signed: *Eric Egan*

Position: *QA Manager*

Date: *4/3/81*
