Docket No. 50-358

May 1, 1981

Mr. Harold Denton, Director
Office on Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

RE: WM. H. Zimmer Nuclear Power Station -
Unit 1 - NUREG 0654
Criteria For Radiological Plans

Dear Mr. Denton:

This letter will confirm a conversation between Messrs. Erickson and Brinkman of CG&E and Messrs. Collins and Hinson of the NRC on May 1, 1981.

CG&E agreed to add a technician on the back shifts so that there would be a dedicated HP/Rad Chem Technician without the responsibility for radwaste operation. (Our previous submittal indicated the HP/Rad Chem Technician would also operate radwaste on the back shifts.)

Our previous submittals will be formally revised as indicated above.

Very truly yours,

THE CINCINNATI GAS & ELECTRIC COMPANY
