April 23, 1981

Mr. Walter P. Haass, Chief
Quality Assurance Branch
Division of Project Management
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Haass:

This letter is to inform you of the assignment of E.L. (Larry) Davis as the Quality Assurance Manager for the Babcock & Wilcox Company (B&W), Nuclear Power Generation Division (NPGD) effective May 1, 1981. Mr. Davis replaces E.V. (Earl) DeCarli.

Mr. Davis joined B&W in 1970 and his various assignments include:

- Engineer in the Advanced Core Engineering Department of the Naval Nuclear Fuel Division (NNFD) where he was responsible for process development, qualification and production of welded assemblies for a prototype naval reactor core. This assignment required a close interface with Quality Control and Quality Assurance.
- Experience in destructive and non-destructive testing (including x-ray, ultrasonic and fiber optics), surface table procedures.
- Supervisor of the Technical Systems Group of the Information Systems Department at NNFD where he supervised ten (10) systems analysts and programmers responsible for developing quality assurance computer-based systems required for controlling the upgrade of naval reactor components.
