

DOCKET NUMBER
PROD. & UTIL. FAC. 5D. 322.....

April 24, 1981

Dr. Joseph M. Hendrie
Chairman
United States Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Joe:

Contrary to what may seem to be a popular perception, there are some people on Long Island who support the completion, licensing, and operation of the Long Island Lighting Company's Nuclear Power Station at Shoreham.

Some of us have had the opportunity to read the recent Nuclear Regulatory Commission's proposal to amend the Atomic Energy Act of 1954 by authorizing the Commission to issue an interim operating license for a nuclear power plant, authorizing fuel loading and low-power operation and testing, in advance of the conduct or completion of an on-the-record evidentiary hearing on contested issues. We believe that this proposal is a positive step.

We would also like to know, however, if there are any measures which individuals and groups of citizens may take within the bounds of existing, prescribed requirements and procedures to implement the licensing of the Shoreham facility and avoid unnecessary delays.

We would appreciate any advice or recommendations which you or members of your staff could offer.

Cordially yours,
Al Prodell
