Mr. Donald E. VanFarowe, Chief  
Division of Radiological Health  
State of Michigan  
Department of Public Health  
3500 North Logan  
P.O. Box 30035  
Lansing, MI 48909

Dear Don:

Enclosed is a copy of a report by the EG&G Aerial Measurements System of the results of an aerial radiological survey of the Michigan Chemical Corporation in St. Louis, MI.

You will note that of the areas surveyed, only the plant site itself showed a large departure from the radiation intensity of natural background emitters found in this area. The data over the plant site indicated an excess of thalium-208.

If I may be of further assistance, please let me know.

Sincerely,

William E. Menczer  
Regional State Liaison Officer
