Dear Mr. Martin:

Enclosed please find the most recent quarterly analysis data for the monitor and in-field wells of the 517 R & D site, March 24 and 25, 1981. These data were hand-delivered to your office on April 1, 1981. With the submittal of these data, three sets of quarterly analyses are now available for the establishment of monitor well action levels. The methodology for establishing these levels has been discussed with Ms. Terry Vandell.

If I may answer any questions concerning this submittal, please call me at (307) 738-2464, or Mr. Bart Conroy at (303) 988-8530.

Sincerely,

Donna L. Wichers
Licensing and Environmental Projects Supervisor
