Docket No. 50-334

Duquesne Light Company  
ATTN: Mr. S. G. Schaffer  
President  
435 Sixth Avenue  
Pittsburgh, Pennsylvania 15219

Gentlemen:

Subject: Region I Management Meeting, Beaver Valley, Unit 1, (Management Meeting Report No. 50-334/81-09)

This refers to the meeting held at our request at the NRC Region I Office on March 19, 1981 relating to activities authorized by NRC License No. DPR-66. This meeting was attended by you and members of your staff and by J. H. Sniezek, Director, Division of Resident and Regional Reactor Inspection, NRC Headquarters, myself, and other members of the NRC staff. It is our view that this meeting was beneficial and improved your understanding of our concerns.

As a result of the meeting, and subsequent discussions by telephone with your staff, we understand that you will provide a written report to Region I by April 3, 1981, regarding the recent approval of the proposed new Duquesne Light Company organizational structure and the status of your submittal to NRC to request the necessary changes in Technical Specifications. In addition, we understand that a description of those measures being taken to strengthen management controls will be provided in your report to address specific programmatic, procedural, and equipment concerns. In particular, we request that your report address those measures in this regard which will be in effect during the transition to the new organization. We believe those measures should include provisions for regular surveillance of plant operations by a member of station management and for a system to feedback operating information to responsible management representatives at all levels to assure that they are cognizant of potential problems during all routine and nonroutine operations.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and the enclosed management meeting report will be placed in the NRC's Public Document Room. If this report contains any information that you (or your contractor) believe to be proprietary, it is necessary that you make a written application within 20 days of this office to withhold such information from public disclosure. Any such application must be accompanied by an affidavit executed by the owner of the information, which identifies the document or part sought to be withheld, and which contains a statement of reasons which addresses with specificity the items which will be

considered by the Commission as listed in subparagraph (b) (4) of Section 2.790. The information sought to be withheld shall be incorporated as far as possible into a separate part of the affidavit. If we do not hear from you in this regard within the specified period, the report will be placed in the Public Document Room.

No reply to this letter is required; however, should you have any questions concerning this meeting, we will be pleased to discuss them with you.

Sincerely,

Boyce H. Grier  
Director
