Dear Ms. Wright:

We are enclosing three (3) copies of NRC-7 "Application for License to Export Nuclear Material and Equipment".

This Californium-252 sealed source is to replenish the previous neutron source (exported under License XB001056) due to source decay.

These sources will be utilized in a nuclear fuel rod assay machine manufactured by National Nuclear Corporation for the measurement of  $^{235}\text{U}$  enrichment.

Thank you for your assistance.

Sincerely yours,

Richard N. Olsen  
Radiation Safety Officer
