Docket No. 50-320

Mr. Gale K. Hovey
 Vice President and
 Director of TMI-2
 Metropolitan Edison Company
 P.O. Box 480
 Middletown, Pennsylvania 17057

Dear Mr. Hovey:

The Nuclear Regulatory Commission has issued the enclosed Amendment of Order for the Three Mile Island Nuclear Station, Unit 2. This Amendment of Order is the result of issues raised by Intervenor Steven Sholly and William Lochstet (Reference 1). The revised requirements had originally been set forth by the February 11, 1980 Order issued by the Director of Nuclear Reactor Regulation. These parties raised concerns regarding the reactor coolant pressure safety limit, remote shutdown monitoring instrumentation, reactor coolant system pressure/temperature limits, and record retention. An agreement was reached among the parties by which all of the issues advanced by Mr. Sholly and one of the issues advanced by Mr. Lochstet have been settled and are hereby addressed in this Amendment of Order.

These revisions to the Technical Specifications are effective immediately.

By this Amendment of Order, the proposed Technical Specifications pending before the Atomic Safety and Licensing Board are also being revised in accordance with the Board's "Order Granting Joint Motion to Approve Stipulation," dated April 10, 1981.

Copies of the related Safety Evaluation and revised pages for the Safety Limits, Limiting Conditions for Operation, and Administrative Controls are enclosed.

Sincerely,

BS
 Bernard J. Snyder, Program Director
 TMI Program Office
 Office of Nuclear Reactor Regulation
