

Appendix A

NOTICE OF VIOLATION

South Bend Medical Foundation

License No. 13-00670-04

As a result of the inspection conducted on March 17, 1981, and in accordance with the Interim Enforcement Policy, 45 FR 66754 (October 7, 1980), the following violations were identified:

1. License Condition No. 14 requires that licensed material be possessed and used in accordance with statements, representations, and procedures contained in application dated September 1, 1980.

Item No. 7 of the above referenced application states the Medical Isotope Committee shall meet as often as necessary to conduct its business but not less than once in each calendar quarter.

Contrary to the above requirement, it was determined through review of records that this condition is not being met. Specifically, a Medical Isotope Committee meeting was held on November 7, 1978, and July 14, 1980. These intervals exceed the quarterly requirement.

This is a Severity Level V violation (Supplement VII).

2. License Condition No. 14 requires that licensed material be possessed and used in accordance with statements, representations, and procedures contained in application dated September 1, 1980.

Item No. 10 of the above referenced application states survey instruments will be calibrated annually.

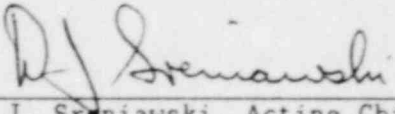

Contrary to the above requirement, it was determined through statements by licensee representatives and the NRC inspectors review of calibration records that this condition was not met. Specifically, the last date of calibration for the Nuclear Chicago Survey Meter Instrument Model No. 740 was in October 1977.

8105110624

This is a Severity Level V violation (Supplement VII).

Pursuant to the provisions of 10 CFR 2.201, you are required to submit to this office within twenty-five days of the date of this Notice a written statement or explanation in reply, including for each item of noncompliance: (1) corrective action taken and the results achieved; (2) corrective action to be taken to avoid further noncompliance; and (3) the date when full compliance will be achieved. Under the authority of Section 182 of the Atomic Energy Act of 1954, as amended, this response shall be submitted under oath or affirmation.

Dated 4/6/81

  
D. J. Sreniawski, Acting Chief  
Materials Radiation Protection  
Section 2
