

APPENDIX A

NOTICE OF VIOLATION

Georgia Power Company
Hatch 1 and 2

Docket Nos. 50-321 and 50-366
License Nos. DPR-57 and NPF-5

As a result of the inspection conducted on February 21 - March 27, 1981, and in accordance with the Interim Enforcement Policy, 45 FR 66754 (October 7, 1980), the following violations were identified.

- A. Technical Specification 6.8.1 requires that written procedures shall be established, implemented, and maintained covering the procedures recommended in Appendix A of Regulatory Guide 1.33. Regulatory Guide 1.33, Appendix A, states in part that safety-related activities should be covered by written procedures. Plant procedure HNP-804, Equipment Storage, paragraph C.1 requires that all items to be maintained in storage will be divided into four levels with respect to the protective measures required to prevent damage, deterioration or contamination of the items.

Contrary to the above, a storage level for the high density fuel storage racks was not designated.

This is a Severity Level V Violation (Supplement I.E.).

- B. 10 CFR 50, Appendix B, Criterion XVI, implemented by Hatch Quality Assurance Manual, Section 16, Paragraph 16.1, states in part that measures shall be established to assure that conditions adverse to quality are promptly corrected.

Contrary to the above, a condition adverse to quality, the deterioration of the protective coverings over the stored high density fuel racks, was not promptly corrected. Although identified by Hatch Nonconformance Report No. 81-223, dated 2/18/81, and as an NRC concern on 3/13/81, the item was still uncorrected on 3/20/81.

This is a Severity Level V Violation (Supplement I.E.).

Pursuant to the provisions of 10 CFR 2.201, you are hereby required to submit to this office within twenty-five days of the date of this Notice, a written statement or explanation in reply, including: (1) admission or denial of the alleged violations; (2) the reasons for the violations if admitted; (3) the corrective steps which have been taken and the results achieved; (4) corrective steps which will be taken to avoid further violations; and (5) the date when full compliance will be achieved. Under the authority of Section 182 of the Atomic Energy Act of 1954, as amended, this response shall be submitted under oath or affirmation.
