Dear Mr. Kinneman:

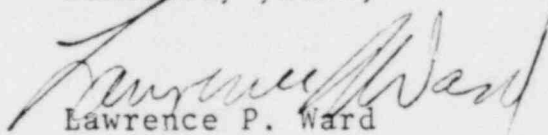

In response to your letter dated February 27, 1981 regarding Mr. Stearns' inspection on February 4, 1981, the following conditions have been corrected:

- Item 1. The nuclear medical technician has been directed to wear protective gloves while handling any and all radiopharmaceuticals.
- Item 2. A weekly comprehensive survey of non-controlled areas has been incorporated into our regular survey plan, and is being logged as such.

Monthly Reviews of the Department Hot Lab Survey will be continued and will include the above mentioned items.

Complete compliance was achieved on February 5, 1981.

Sincerely yours,
