GLEN ELLYN, ILLINOIS 60137

APR 17 1981

Docket No. 50-373
Docket No. 50-374

Commonwealth Edison Company
ATTN: Mr. Cordell Reed
Vice President
Post Office Box 767
Chicago, IL 60690

Gentlemen:

This refers to the routine safety inspection conducted by Mr. I. T. Yin of this office on March 30-31, and April 1-2, 1981, of activities at La Salle County Station, Units 1 and 2, authorized by NRC Construction Permits No. CPPR-99 and No. CPPR-100 and to the discussion of our findings with Mr. L. J. Burke and others of your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

No items of noncompliance with NRC requirements were identified during the course of this inspection.

Based on the results of this inspection which included a review and evaluation of your corrective actions in response to our Immediate Action Letter dated August 14, 1980, and our subsequent letter dated March 19, 1981, we concluded that Commonwealth Edison Company could resume small bore piping design and installation work at La Salle County Station, Unit 1 and Unit 2. In addition, the special records you were maintaining to document the Unit 2 piping and supports that were worked on, as delineated in our March 19, 1981, letter, are no longer required. We consider this issue resolved.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC's Public Document Room, except as follows. If this report contains information that you

or your contractors believe to be proprietary, you must apply in writing to this office, within twenty-five days of the date of this letter, to withhold such information from public disclosure. The application must include a full statement of the reasons for which the information is considered proprietary, and should be prepared so that proprietary information identified in the application is contained in an enclosure to the application.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

for James G. Keppler
Director
