I&E BULLETING 81-02: FAILURE OF GATE TYPE VALVES TO
CLOSE AGAINST DIFFERENTIAL PRESSURE

The Sacramento Municipal Utility District has reviewed I&E Bulletin 81-02, Failure of Gate Type Valves to Close Against Differential Pressure, dated April 9, 1981. We have determined that there are no valves manufactured by Westinghouse Electro-Mechanical Division (W-EMD) or Borg-Warner Nuclear Valve Division (BW-NVD) installed in safety related systems nor maintained as spares at Rancho Seco Nuclear Generating Station, Unit 1. Since no affected valves were identified, no further response to this bulletin is necessary and we will consider this bulletin closed out.
