

Appendix A

NOTICE OF VIOLATION

Nuclear Consulting Services, Inc.

License No. 34-15216-01

As a result of the inspection conducted on March 18, 1981, and in accordance with the Interim Enforcement Policy, 45 FR 66754 (October 7, 1980), the following violations were identified:

1. 10 CFR 19.12 requires training of all personnel who work in or frequent a restricted area. This training is to include but is not limited to:
 - a. health protection problems associated with exposure to radioactive materials, and
 - b. the appropriate response to warnings made the event of any unusual occurrence or malfunction that may involve exposure to radiation or radioactive material.

Contrary to the above, individuals working in the loading dock/filter storage area as well as within the chemistry lab were not instructed in the health protection problems associated with exposure to radioactive materials. Moreover, an employee responsible for receipt of I-131 packages was not instructed in the appropriate response to warnings made in the event of any unusual occurrence, specifically, she was not instructed in appropriate emergency procedures for the receipt of a damaged byproduct material package.

This is a Severity Level V violation (Supplement VII).

2. License Condition 20 states that the licensee shall possess and use licensed material in accordance with statements, representations and procedures contained in application dated August 2, 1977, and other referenced letters. This application specifies weekly area surveys and wipes of the radioisotope lab be performed and recorded.

Contrary to the above, from an examination of survey results, it appeared that area surveys were not performed between August 5 and 22, 1980, and September 19 and December 23, 1980.

This is a Severity Level V violation (Supplement VII).

Pursuant to the provisions of 10 CFR 2.201, you are required to submit to this office within twenty-five days of the date of this Notice a written

8106010502

statement or explanation in reply, including for each item of noncompliance: (1) corrective action taken and the results achieved; (2) corrective action to be taken to avoid further noncompliance; and (3) the date when full compliance will be achieved. Under the authority of Section 182 of the Atomic Energy Act of 1954, as amended, this response shall be submitted under oath or affirmation.
