MAY 19 1981

Tennessee Valley Authority
 ATTN: Mr. L. M. Mills, Manager
 Nuclear Regulation and Safety
 400 Chestnut Street, Tower II
 Chattanooga, Tennessee 37401

Gentlemen:

We are in the process of reviewing your application for the storage of new fuel at Bellefonte Nuclear Plant Unit 2. The information provided by the application of January 23, 1981, as supplemented May 6, 1981, does not provide sufficient details of the spent fuel racks for us to make an independent calculation of the neutron multiplication factor. Please provide us with a detailed drawing of the fuel racks showing the dimensions, materials of construction, and material thickness between assemblies.

Based on the conversation with Mr. Percy Hammons on May 14, 1981, we expect TVA to provide justification for proprietary withholding of the information sent with the May 6, 1981, letter.

Sincerely,

Original Signed By:
 R. L. Stevenson
