70-1068
Amendment No. 4

MAY 26 1981

University of Florida
ATTN: Dr. Nils J. Diaz, Director
Department of Nuclear Engineering Sciences
102 Nuclear Reactor Building
Gainesville, Florida 32611

Gentlemen:

In accordance with your application dated November 9, 1978 and supplement dated July 15, 1980, and pursuant to Title 10, Code of Federal Regulations, Part 70, Materials License No. SNM-1050 is hereby amended to authorize: (1) the change of storage location for SPERT fuel and (2) extension of the expiration date of the license to July 31, 1983.

All other conditions of this license shall remain the same.

The extension of the expiration date of SNM-1050 to July 31, 1983, initiates action toward combining University of Florida's two licenses, SNM-1050 and SNM-50, as requested. The application for renewal in 1983 should consolidate the activities currently covered by the aforementioned licenses and this consolidation will be reflected in the renewed license. Simultaneously one license will be terminated and the docket files combined. Enclosed is a draft regulatory guide which specifies the format and content of a renewal application. Although it was not developed for university licenses we suggest that your renewal application address the appropriate items in this guide.
