Inspection Summary:

Special Inspection on April 2-3, 1981 (Report No. 50-309/81-10)

Areas Inspected: Special, announced, inspection. This inspection was conducted by a regional based NRC inspector of the licensee's physical security program relative to the contingency security force organization and related records and reports. The inspection involved 10 inspector-hours onsite.

The inspection was initiated as a result of a threatened strike by the contract guard force. The contract security service contract was terminated and replaced with an interim contract security service as the contingency security organization on site.
