Mr. James E. Devine, Assistant Director
Export/Import and International Safeguards
Office of International Programs
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: XSNM00978: Japan; Request for Amendment.

Dear Mr. Devine:

General Atomic Company (GAC) makes application, pursuant to 10 CFR 110, for amendment to subject license to add two ultimate consignees and extend the license's validity period. The new consignees are Japan Atomic Research Institute and Musashi Institute of Technology. Complete addresses are provided on the attached Form NRC-7. We also request that the expiration date of the subject license be changed to 1 July 1984.

GAC is engaged in the manufacture and sale of nuclear reactors, nuclear instrumentation systems, components therefor, and cooperative research in the development and testing of the components and fuels for research reactors. In the normal servicing of our research reactors we are required to provide replacement equipment and materials. In this instance we will be supplying fuel elements to the research reactors in these three locations.

We request that you issue an amendment at your earliest convenience.

If you have questions, please direct them to the undersigned at (714) 455-2823.

Very truly yours,

William R. Mowry
Licensing Administrator
Nuclear Materials Control Division
