License No. 48-05006-03

Gentlemen:

This refers to the safety inspection conducted by Dr. W. J. Adam of this office on June 1, 1981, of activities at Bellin Memorial Hospital authorized by NRC Byproduct Material License No. 48-05006-03 and to the discussion of our findings with you at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions described in your letters dated November 9 and 30, 1977, regarding apparent items of noncompliance found during our October 17, 1977, inspection. We have no further questions regarding these matters.

No items of noncompliance with NRC requirements were identified during the course of this inspection.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

D. G. Wiedeman, Acting Chief  
Materials Radiation Protection
