

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

JUN 3 1981

Docket No. 50-334

Mr. J. J. Carey, Vice President  
Duquesne Light Company  
Nuclear Division  
Post Office Box 4  
Shippingport, Pennsylvania 15077

Dear Mr. Carey:

As a result of evaluations of TMI-related requirements, licensees were directed (by NUREG-0578, "TMI-2 Lessons Learned Task Force Status Report and Short-Term Recommendations," and by NUREG-0737, "Clarification of TMI Action Plan Requirements," Item II.B.2) to perform a review of plant shielding design and to provide for adequate post-accident access to vital areas.

Final design details of actions taken, or proposed to meet the above requirements were to be available by January 1, 1981.

The NRC is presently reviewing the Category B plant shielding modifications (II.B.2).

You are asked to provide, by June 30, 1981, a summary documentation of your final shielding design review (using criteria and clarification of NUREG-0737), a description of the results of your review, and a description of the modifications made, or to be made, to implement the result of your shielding review.

Sincerely,

Steven A. Varga, Chief  
Operating Reactors Branch No. 1  
Division of Licensing
