Mr. Robert E. Phelps, P.E.
Chief, Division of Industrial Wastewater
State of Ohio Environmental Protection
Agency
361 E. Broad Street, Box 1049
Columbus, Ohio 43216

Dear Mr. Phelps:

The Cleveland Electric Illuminating Company has applied to the U. S. Nuclear Regulatory Commission for an operating license for the Perry Nuclear Power Plant, Units 1 and 2. We are preparing an environmental impact statement as part of our operating license review. The EIS will include considerations of water quality and aquatic biological impacts. NRC staff is scheduled to visit the site on June 23, 1981 and to meet with the applicant on June 24 (and 25 if necessary) to discuss the EIS review.

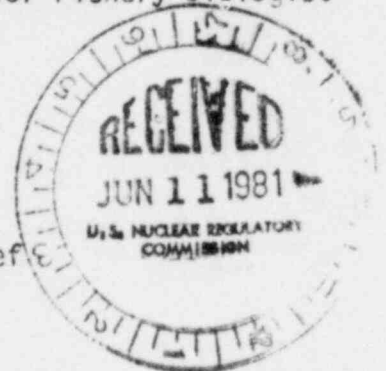

It is NRC policy to defer to the NPDES Permit system for specifying measures to protect the aquatic environment, however, the EIS, will analyze and disclose the potential for impact. In the interest of avoiding duplication of effort, and so that NRC can be fully informed of state-recognized problems, we would like to discuss reviews and findings of your agency relative to potential aquatic impacts at Perry. To accomplish this, I would like to invite the participation of your staff, and especially 316 coordinator Joseph Reidy, during the site visit and subsequent discussions. Mr. Reidy has been most helpful to NRC in other nuclear plant environmental reviews, and his advice on the Perry case would be appreciated, again.

If you need further information, please contact either Dean Houston, Licensing Project Manager at (301) 492-8593, or Clarence Hickey, Senior Fishery Biologist at (301) 492-4677.

Sincerely,

Original signed by

Albert Schwencer, Chief
