UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

MAY 20 1981

DOCKET NUMBER  
PROPOSED RULE **PR-2**  
**(46 FR 17216)**

The Honorable C. I. Hayakawa  
United States Senate  
Washington, D.C. 20510

Dear Senator Hayakawa:

Thank you for your recent inquiry on behalf of Bruce Allen of Redondo Beach, California, who expresses concern about proposed amendments to the Commission's Rules of Practice, 10 CFR Part 2.

The proposed changes, designed to expedite the hearing process for the licensing of nuclear power plants, are now under consideration by the Commission. Over 600 public comments were received on the draft proposals.

It is expected that Commission action, including significant modifications in the amendments as originally proposed, will be taken in the next several weeks. The final changes will be published in Federal Register.

Sincerely,

Carlton Kammerer, Director  
Office of Congressional Affairs

To Senator S. I. Hayakawa

I am extremely offended at this move by the NRC to reduce the public's right to gather information regarding the licensing of Nuclear Power Plants. This is nothing but a desperate attempt to sidestep the damning evidence which will hopefully prevent these inherently dangerous facilities from being constructed on fault lines, near heavily populated areas and similar forms of lunacy.

Sincerely,

Bruce Allen
