DOCKET NO. 50-311

Your letter dated April 16, 1981 requested certain information related to those control systems whose failure or malfunction could seriously impact plant safety. Due to the allocation of resources necessary to resolve items identified in the recent Salem emergency preparedness appraisal and to close out items associated with the fire protection SER, we find that we cannot provide this information by the date requested. We therefore propose to submit the requested information by July 31, 1981.

Should you have any questions in this regard, do not hesitate to contact us.

Very truly yours,
